# REIMAGINED FOR THE MODERN ERA

---

New York City's first all-glass office building, Lever House, continues to inspire generations of metropolitan architecture with its revolutionary style and daring use of space.

WatermanClark and Brookfield Properties are honoring this historic landmark with a \$100 million redevelopment project, elevating Lever House's ideals of a future-facing, functional office beyond today's standards for modern service and hospitality.

HOUSE

PARK AVENUE

# DEDICATED OUTDOOR AIR SYSTEM

(DOAS) Best-in-class HVAC implementation

DOAS is a HVAC system which provides 100% outside air supply to Lever House’s individual floors.

Within each floor, individual DOAS units provide as many climate zones as deemed desirable, providing a completely customizable room-by-room climate environment.

Air is never circulated between floors, vs. 40-85% recirculation in conventional buildings.

120  
SQ. FT

120 square feet per tower floor is recaptured for occupant use.

Breathing better air leads to significantly better cognitive performance by employees.

HEPA filtration of outside air is possible.

2.0  
MORE

2X more outside air than conventional buildings.

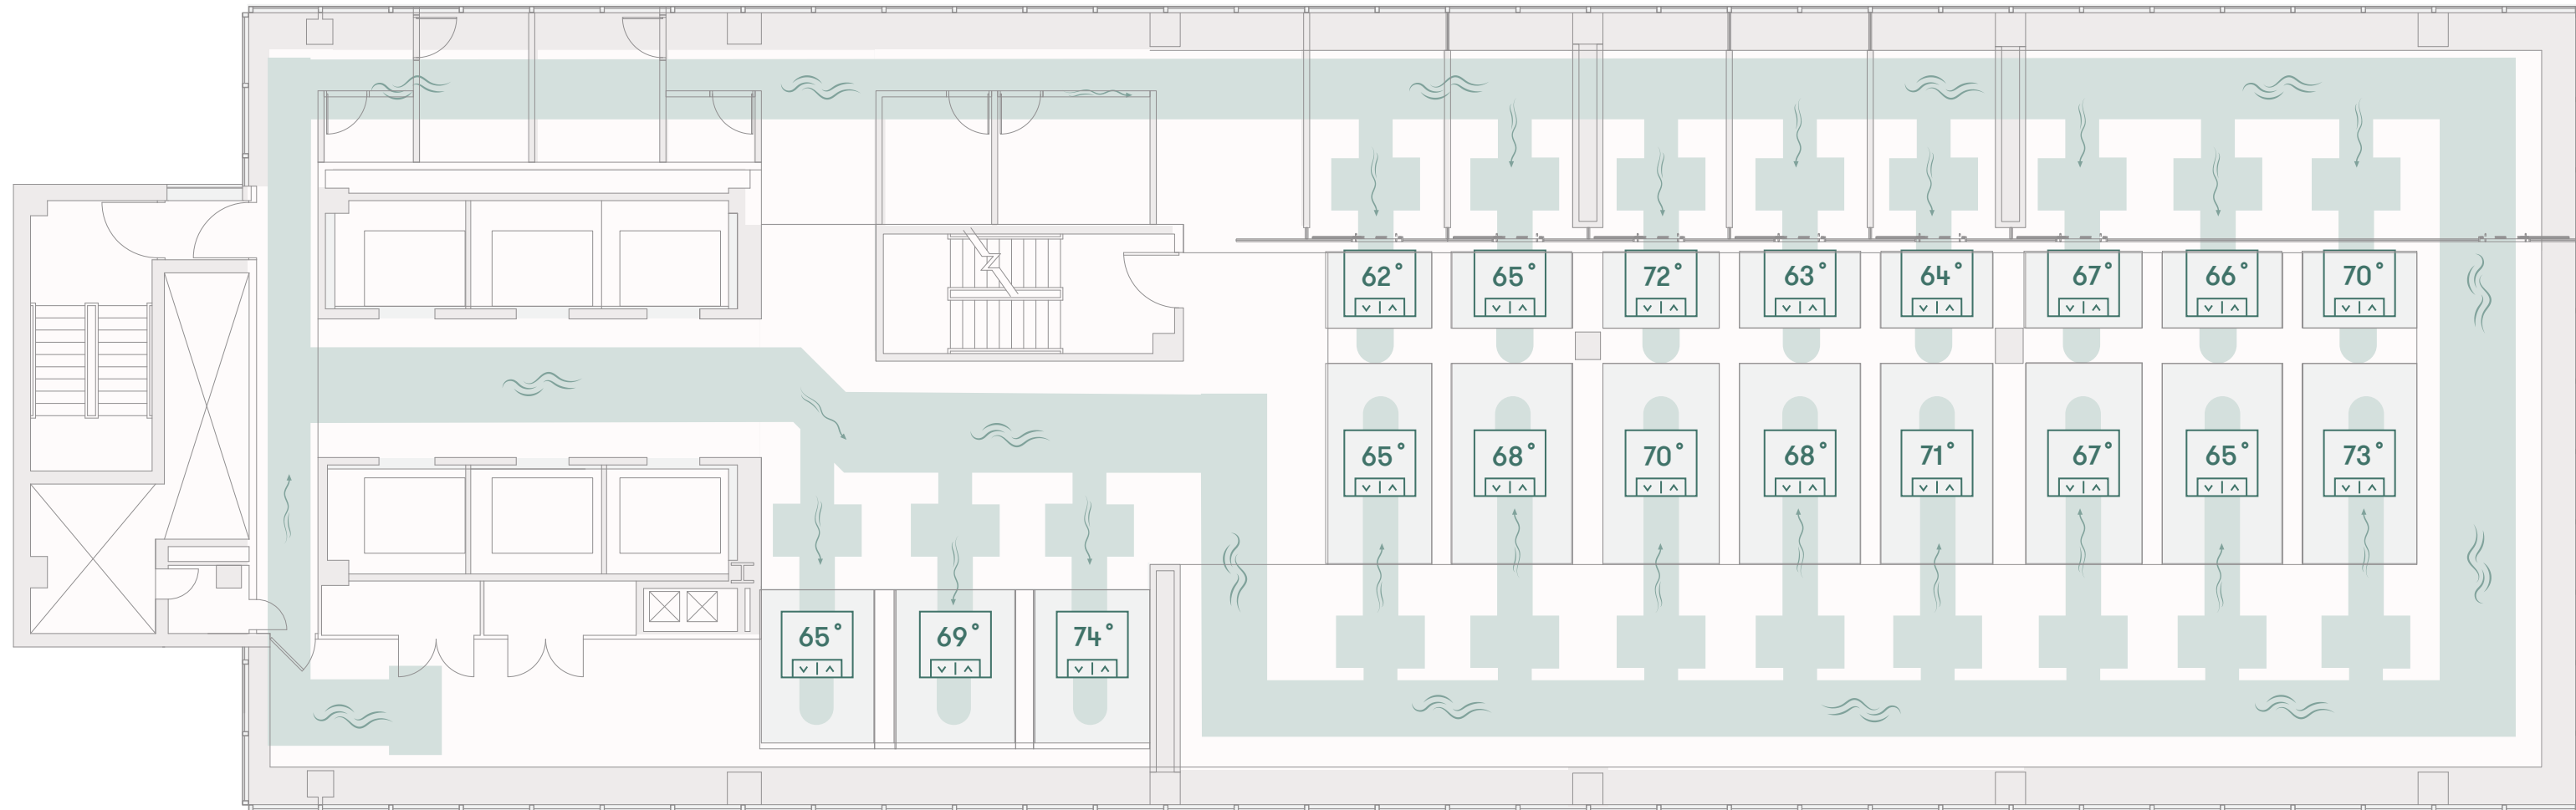

1.5  
MORE

1.5X more outside air than Manhattan’s newest developments.

# DIRECT OUTSIDE AIR SYSTEM

Completely customizable climate control

- Room-by-room climate is completely customizable within each floor.
- Air is never circulated between floors vs. 40-85% recirculation in conventional buildings.
